

ÇANKAYA UNIVERSITY

Faculty of Arts and Sciences

Course Definition Form

Part I. Basic Course Information

Department Name	MATHEMATICS	Dept. Numeric Code	2 7
Course Code	M A T H 3 1 5	Number of Weekly Lecture Hours	4
		Number of Weekly Lab/Tutorial Hours	0
		Number of Credit Hours	4
Course Web Site	http://math315.cankaya.edu.tr		ECTS Credit
			0 7

Course Name <i>This information will appear in the printed catalogs and on the web online catalog.</i>	
English Name	Partial Differential Equations
Turkish Name	Kısmi Türevli Denklemler

Course Description <i>Provide a brief overview of what is covered during the semester. This information will appear in the printed catalogs and on the web online catalog. Maximum 60 words.</i>	
First order equations; linear, quasilinear, and nonlinear equations; classification of second order linear partial differential equations; canonical forms; the Cauchy problem for the wave equation; Laplace and heat equations (Sturm-Liouville Problems)	

Prerequisites (if any) <i>Give course codes and check all that are applicable.</i>	1 st	2 nd	3 rd	4 th
	M A T H 2 4 5	M A T H 1 5 2		
	<input type="checkbox"/> Consent of the Instructor	<input type="checkbox"/> Senior Standing	<input type="checkbox"/> Give others, if any. <input style="width: 100%;" type="text"/>	
Co-requisites (if any)	1 st	2 nd	3 rd	4 th
Course Type <i>Check all that are applicable</i>	<input checked="" type="checkbox"/> Must course for dept. <input type="checkbox"/> Must course for other dept.(s) <input type="checkbox"/> Elective course for dept. <input type="checkbox"/> Elective course for other dept.(s)			

Course Classification <i>Give the appropriate percentage for each category.</i>				
Category	Mathematics & Natural Sciences	Engineering & Architectural Sciences		
Percentage	80	20		

Part II. Detailed Course Information**Course Objectives***Maximum 100 words.*

To introduce the basic terminology of partial differential equations and briefly examine how they arise in physical phenomena and other disciplines

Learning Outcomes*Explain the learning outcomes of the course. Maximum 10 items.*

- 1) The students will be able to solve many types of partial differential equations.
- 2) The students will use the terminology of differential equations which help them in modeling problems from various disciplines.

Textbook(s)*List the textbook(s), if any, and other related main course material.*

Author(s)	Title	Publisher	Publication Year	ISBN
I.N. Sneddon	Elements of Partial Differential Equations	Dover Publications Mineola	2006	0-486-45297-2
P. K. Kythe, P. Puri, M. R. Schaferkotter	Partial Differential Equations and Boundary Value Problems with Mathematica, 2 'nd Ed.	Boca Raton Chapman and Hall/CRC	2003	1-584-88314-6

Reference Books*List, if any, other reference books to be used as supplementary material.*

Author(s)	Title	Publisher	Publication Year	ISBN
L. C. Evans	Partial Differential Equations	Providence, Rhode Island: AMS	1998	0-82180-777-2

Teaching Policy*Explain how you will organize the course (lectures, laboratories, tutorials, studio work, seminars, etc.)*

4 hours of lecturing per week. Attendance is compulsory.

Laboratory/Studio Work*Give the number of laboratory/studio hours required per week, if any, to do supervised laboratory/studio work and list the names of the laboratories/studios in which these sessions will be conducted.*

--

Computer Usage*Briefly describe the computer usage and the hardware/software requirements for the course.*

--

Course Outline	
<i>List the weekly topics to be covered.</i>	
Week	Topic(s)
1	Introduction
2	First-Order Linear Equations
3	First Order Quasi-Linear Equations
4	Integral Surfaces Passing Through a Given Curve
5	Surfaces Orthogonal to a Given System of Surfaces
6	First Order Nonlinear Equations
7	First Order Nonlinear Equations
8	Second Order Linear Equations
9	Second Order Linear Equations
10	Sturm-Liouville Problem
11	Fourier Series
12	Hyperbolic equations: The wave Equation
13	Parabolic equations: The heat Equation
14	Elliptic equations: The Laplace Equation (Sturm-Liouville Problems)

Grading Policy								
<i>List the assessment tools and their percentages that may give an idea about their relative importance to the end-of-semester grade.</i>								
Assessment Tool	Quantity	Percentage	Assessment Tool	Quantity	Percentage	Assessment Tool	Quantity	Percentage
Homework			Case Study			Attendance		
Quiz(es)			Lab Work			Field Study		
Midterm Exam	2	60	Classroom Participation			Project		
Term Paper			Oral Presentation			Final Exam	1	40

ECTS Workload			
<i>List all the activities considered under the ECTS.</i>			
Activity	Quantity	Duration (hours)	Total Workload (hours)
Attending Lectures (<i>weekly basis</i>)	14	4	56
Attending Labs/Recitations (<i>weekly basis</i>)			
Compilation and finalization of course/lecture notes (<i>weekly basis</i>)	14	1,5	21
Collection and selection of relevant material (<i>once</i>)	1	12	12
Self study of relevant material (<i>weekly basis</i>)	14	1.5	21
Take-home assignments			
Preparation for quizzes			
Preparation for mid-term exams (<i>including the duration of the exams</i>)	2	20	40
Preparation of term paper/case-study report (<i>including oral presentation</i>)			
Preparation of term project/field study report (<i>including oral presentation</i>)			
Preparation for final exam (<i>including the duration of the exam</i>)	1	25	25
TOTAL WORKLOAD / 25			175/25
ECTS Credit			7

Total Workloads are calculated automatically by formulas. To update all the formulas in the document first press CTRL+A and then press F9.

Program Qualifications vs. Learning Outcomes Consider the program qualifications given below as determined in terms of learning outcomes and acquisition of capabilities for all the courses in the curriculum. Look at the learning outcomes of this course given above. Relate these two using the Likert Scale by marking with X in one of the five choices at the right.						
No	Program Qualifications	Contribution				
		0	1	2	3	4
1	Adequate knowledge in mathematics; ability to use applied and theoretical information in these areas to solve pure and applied mathematical problems.					X
2	Ability to use modern computational tools to analyze an abstract or real life problem					X
3	Adequate knowledge in theoretical and historical background in mathematics				X	
4	Ability to work individually and in teams efficiently, ability to collaborate effectively in teams to analyze complex systems from intra-disciplinary and multi-disciplinary areas				X	
5	Ability to communicate effectively in English about technical subjects, both orally and in writing				X	
6	Ability to use, develop and implement new experiments and algorithms to solve scientific, engineering and financial problems				X	
7	Ability to analyze a mathematical problem using both analytical and numerical methods; use and compare theoretical and simulational methods to gain deeper insight				X	
8	Ability to report the findings, conclusions and interpretations related to a project in the area of pure and applied mathematics, ability to write technical reports, to prepare and conduct effective presentations				X	
9	Recognition of the need for lifelong learning; ability to access information, to follow developments in science and technology, and to keep continuous self improvement				X	
10	Awareness of professional and ethical responsibility issues and their legal consequences					X

Scale for contribution to a qualification: 0-none, 1-little, 2-moderate, 3-considerable, 4-highest
